CHEMICAL PEELS

PCA SENSI PEEL | \$75

Let the sensi peel strengthen, brighten, and effectively treat sun damaged skin for even the most sensitive skin types. This multi-faceted treatment is anti bacterial and anti inflammatory with reducing redness shortly after your treatment.

PCA ULTRA PEEL | \$75

Specifically designed to treat dehydrated maturing skin. Ideal for smoker's skin, hyperpigmentation, sun damage, acne, and some forms of rosacea.

OBAGI BLUE PEEL | \$400

This peel is designed to significantly improve the appearance and health of your skin. A low concentration of trichloroacetic acid (TCA) mixed with an innovative blue base effectively removes the thin surface layers of aged and damaged skin. May be used on the face or other parts of the body.

FACIALS

CUSTOM FACIAL | 60 min | \$90

Let our skin experts customize a facial to meet *your* skin's needs. Popular requests include hydration for dry skin, collagen boosters, clarification, tightening or overall brightening of your skin.

FILLERS

JUVEDERM® ULTRA | \$550

JUVEDERM® ULTRA PLUS | \$600

RESTITYLANE | \$500

PERLANE | \$600

SCULPTRA | \$900

BOTOX® | \$10 PER UNIT

DYSPOUR | \$4 PER UNIT

PHYSICIAN GRADE SKIN PRODUCTS

Obagi | Neocutis | Clayton Shagal

Latisse® | Jane Iredale Skin Care Makeup

EXFOLIATION

MICRODERMABRASION | \$50

Gentle ablating crystal tip combined with suction removes the dead outer layers of the skin to reveal smoother, softer skin, and reduce the appearance of pores.

DERMALPLANNING | \$75

A facial skin sloughing technique used to treat deep or raised scars, wrinkles, "crow's feet", uneven pigmentation, sun damage, and age spots by removing the outer layer of skin.

SKIN REJUVENATION

FOTOFACIAL RF | \$1500 (Series of 5, consult required)

The most up-to-date impulse light combined with radio frequency to actively fight skin irregularities. This special FotoFacial RF technology can specifically target hyper pigmentation, fine lines, vascular complications (rosacea, telangiectasia), acne scars and skin texture, full body photo therapy repair, and skin tightening.

MATRIX IR | \$1000 (Series of 5, consult required)

Only the Matrix IR™ cLos™ fractional applicator combines Fractional Optical Energy with Bi-Polar Radio Frequency (RF) to produce deep dermal heating to effectively treat wrinkles, texture irregularities, scars, and stretch marks. The Matrix IR™ applicator both shrinks and generates new collagen while protecting the epidermis.

REFIRM SKIN TIGHTENING | \$1000

(Series of 5, consult required)

A nonsurgical way to fight gravity and the toll that time has taken on your skin. With ReFirme™Skin Tightening, you will see and feel the difference as your loose skin becomes increasingly firm and taut. ReFirme™ features the revolutionary cLos™ combination of Bi-Polar Radio Frequency and Light energies to precisely heat the dermal tissue within the targeted treatment area. This treatment stimulates collagen production, diminishes fine wrinkles and produces a firming effect to make skin appear tighter and smoother. It's quick, virtually painless and requires no downtime.

Matrix RF | \$2500 (Series of 5, consult required)

Matrix RF™ Fractional skin resurfacing helps restore your skin's beauty by reducing the appearance of mild to moderate wrinkles, red and brown spots, and textural irregularities. This treatment improves skin tone, texture, and color-- even in darker skin tones. Traditional ablative resurfacing heats and removes the complete surface of the skin, resulting in a longer recovery period. Fractional technology reaches deeper into the skin, but uses patterns of dots to allow for significantly less recovery time compared with traditional CO2 laser resurfacing.

VELASHAPE | consult req

Features the revolutionary combination of Bi-Polar Radio Frequency (RF), infrared light energies, plus negative pressure and massage. Vacuum and specially designed rollers manipulate and smooth the skin to facilitate safe and efficient energy delivery. The combination of infrared and conducted RF energies increases oxygen availability to the cells by heating the skin. This, together with the increase in the metabolism of the fat cells, leads to the shrinkage of fat cells thereby shrinking the size of the fat chamber. Many patients describe the treatment sensation as an intense deep-tissue heated massage. The VelaShape™ is the only FDA approved laser for cellulite and body contouring on the market

LASER HAIR REMOVAL | consult req

Using the latest technology, we can effectively treat even minimally pigmented hair and all skin types. The laser is pulsed for only a fraction of a second. The duration of each pulse, and the system's unique patented contact cooling hand-piece helps protect the skin. The pigment in the hair absorbs the laser light and converts the light to heat. The heat, in turn, damages the follicle, eliminating or significantly impeding the hair's growth and inhibiting its ability to grow back.
