

Dr. Geoffrey E. Leber

Paradise Valley, Arizona

ASK DR. LEBER

WHAT SINGLE CONCEPT BEST SUMMARIZES YOUR PRACTICE?

For me, it's all in the details. The extensive collection of before-and-after photos, the design of our office and the attentiveness of my staff are all indicative of the meticulous care we strive to provide.

WHAT DOES YOUR OFFICE LOOK LIKE?

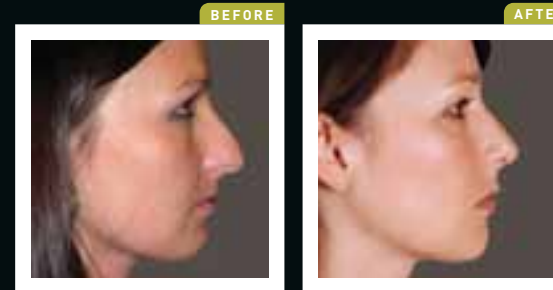

It is set on a beautiful 10-acre medical campus, which includes state-of-the-art operating rooms as well as overnight facilities. There is also a full-service medical spa, which offers nonsurgical procedures such as lasers, facial fillers and Botox®.

WHAT NONSURGICAL PROCEDURES DO YOU OFFER?

The Matrix RF™ is a popular choice for treating wrinkles and spots, while also improving skin texture. The Triniti™ Skin Series improves wrinkles, discoloration as well as sagging—all in a single office visit. Botox®, injectable fillers and chemical peels are also easy ways to turn back the hands of time without surgery.

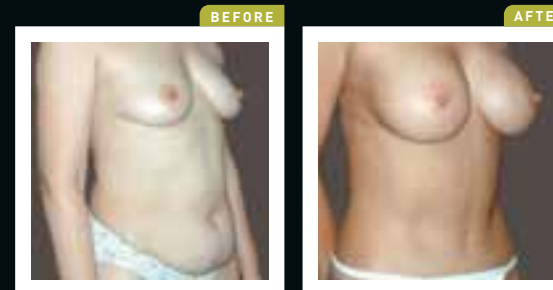

Beauty is in the Details

Dr. Leber credits his many awards and achievements to his persistent attention to detail. Booking adequate time for each consultation allows him to be thorough, so patients never feel rushed. Ultra-natural-looking results are achieved by "going the extra mile" on each case. For example, during tummy tucks, he spends extra time creating a natural-looking bellybutton and adding vertical and horizontal internal sutures. This effectively lowers and narrows the waistline to create a firm, toned and natural shape, instead of an overly tightened look. Similarly, his dermal wing mastopexy (breast lift) works like an internal bra to enhance fullness in the cleavage area and help keep the breasts lifted longer.

STRATEGY FOR SUCCESS

"Nose surgery, like the kind I performed on this 32-year-old, can help correct the size and profile of a nose that is too large and therefore out of proportion with the rest of the face," says Dr. Leber, who asserts that rhinoplasty surgery can also help those with impaired breathing, offering both functional and aesthetic benefits.

CREATING FEMININE CURVES

Concerned with the size of her breasts, and skin laxity, visible stretch marks and hanging fat in the abdominal area, this 41-year-old patient wanted a new look. "A breast augmentation, tummy tuck and liposuction of the flanks, back and inner and outer thighs gave her a much more feminine silhouette," Dr. Leber says. "Now she has the confidence and body that make her feel proud."

"the key to my success is an appreciation for detail"

Rhinoplasty
Botox®
Injectable Fillers
Corrective Surgery

ABOUT DR. LEBER

WHAT IS THE MOST REWARDING PART OF YOUR JOB?

I love getting notes and emails from my patients. Hearing that they feel more confident or happy as a result of their experience here feels really good. Even better, when a patient refers a friend or family member to me, it shows me that they trust me and have a lot of confidence in my skills.

WHAT DOES A CONSULTATION WITH YOU ENTAIL?

I take the time to listen closely to each patient. Then, I take photos and put together a customized surgical plan to achieve their desired outcome. After I go through the plan with the patient, I answer all of their questions and encourage them to call me if they think of additional questions later. My goal is to make every patient feel comfortable and prepared, which allows them to make an informed decision when they are ready.

WHAT ARE YOUR TOP PRIORITIES?

Safe and natural-looking improvements, with minimal discomfort and recovery time.
